

Parts

| |

Updated 2011-04-04

This page is in no way complete and needs your help. We are looking for many Daihatsu Part Numbers as well as Replacement Part Numbers. Please post any new information in this [forum thread](#) and once the info is added to this list the post will be deleted from the forum and [credit](#) to you placed at the bottom of this page. Accuracy is of utmost importance!

The part numbers are universal for the Rocky, Feroza's, & Sportraks.

To purchase a part simply copy and paste the manufacturer and part number into Google or your favorite Search Engine. If searching using the Daihatsu Part Number we've found that some sites condense the number so instead of using the Daihatsu format of the number (example: 11701-87101-000) they will list it as 11701-8710, 1170187101000, or 1170187101. Note that there is also a list of suppliers suggested by Warfs Members [here](#).

Items marked in RED have questionable or missing part numbers which we are trying to locate or verify their accuracy.

Note: The HDC & HDE Engines are nearly identical, the main difference being is that the HDC was Carbureted and the HDE Fuel Injected. The Daihatsu Applause and Charade also used versions of this engine.
